

# 12 Reasons to Reject Vaccination

**\*1. The New England Journal of Medicine** Chief Editor **Marcia Angell MD.**, “It is simply no longer possible to believe much of the clinical research that is published or to rely on the judgement of trusted physicians or authoritative medical guidelines.” Also **Lancet** Chief Editor **Dr. Richard Horton**, “...much of the scientific literature, perhaps half, may simply be untrue...flagrant conflicts of interest...science has taken a turn towards darkness.”

**2. \*Vaccine manufacturers list vax ingredients:** mercury, Simian (SV40) virus, pig gelatin, hydrochloric acid, insect, monkey & aborted baby cells, aluminium, cancer tumors, squalene, formaldehyde, sorbitol etc. Vaccine contaminants include cyanide, nickel, lead, arsenic, tin, urea (urine waste).

**3. Manufacturers warn vax injuries** include polio, encephalitis, paralysis, multiple sclerosis [MS], convulsions, cot death [SIDS], meningitis, autism, epilepsy, anaphylaxis, cancer, death. Claiming vax protect us from disease is contradicted as authorities report vaxed patients can catch disease from and also infect both the vaxed and unvaxed. Impossible if vax work.

**4. Vax ignores 18 life-saving medical and legal requirements. Before any vax** the patient’s symptoms, weight, medical history, medications, allergies, age, sex and race should be examined and a risk-benefit analysis done. Their doctor must disclose all ingredients, list all harmful effects & get informed consent. A written prescription is essential and must identify the doctor, patient (never groups), disease, dose, vaccine and length of effectiveness.

**5. No vax has ever been scientifically tested:** randomised, long-term, large sample, *inert* placebo, double blind study, to show: a) they work, b) are safe, and c) which group is healthier. The US Health Dept lost a landmark \*2018 Court case after claiming for 32 years vax were safe **with no proof**. Also, they had never done the legally required yearly safety research the U.S. Congress ordered.

**6. The main cause of disease is toxemia (blood poisoning)** from ingesting drugs, chemicals, adulterated, GE, processed, irradiated food/ drink. Our bodies self-heal if given rest, exercise, sunlight, relaxation, sleep, fresh organic food (often raw), pure

water/air and fasting. These centuries old traditional healing methods contrast current medicine which is based on suppressing and removing symptoms with expensive drugs, surgery, chemo and radiation, not on understanding, preventing and restoring poisoned bodies to health. Our decisions/choices mean good health or long-term family illness.

**7. Autism soared from 1 person in 5,000 (1974) to 1 in 25 (2021) after MMR [Measles/Mumps/Rubella] vax** began in the US. The drug company Sanofi Pasteur warned: “Adverse events include autism.” Dr H. Wang, Dir. Special Needs Children, reported in 2005: “The autism rate for Amish [who don’t vax] in Ohio was 1 in 15,000.” In 2004, researchers at the Centres for Disease Control [CDC] found a huge rise in autism in African American boys by age 3 **after MMR vax**. Sen/Scientist Dr W. Thompson **admitted** his CDC team falsified and tried to erase the proof that vax causes autism. US. laws bar vax companies being sued. The tax funded *Vax Court* paid \$5 billion: vax proven in 83 trials to have caused the autism.

**8. Less than one percent of vaccine injuries/deaths are reported,** a U.S. Health Department \*study by Harvard Medical School found. Doctors and scientists who reveal vax harm are defunded & persecuted. We have 200 years of medical disasters: mercury, lead, childbed fever deaths, smoking, Prozac, thalidomide, asbestos, dioxin, scurvy, fluoridation, opioids, dieldrin, ECT, Vioxx, heroin etc. All claimed, **as are vax**, to be safe and effective. Only we should decide if we or our children take drugs. This unalienable right is confirmed by S.51xxiiiA of our Australian Constitution.

**9. Medicine and vax are based on a refuted theory on germs by Louis Pasteur** who copied and misinterpreted the brilliant scientist, \*Doctor Antoine Béchamp, who demonstrated disease is caused by toxemia: a build up of metabolic waste/toxins – NOT germs. Professor/ Sir Alexander Ross MD Royal Society of England Fellow “I do not question the existence of infinitesimal micro-organisms but they are the result, not the cause, of disease. They are the scavengers; their legitimate work is to clean out the sewers of our bodies. Wherever

there is decay, pus or decomposing matters, these little lifesavers are doing their work of neutralisation, sanitation and purification...”. Our bodies create specific bacteria to heal us. Germs don’t attack healthy tissue. Without them the body would die.

**10. Worldwide government** \*statistics show that diseases such as chickenpox, Flu, measles, polio, TB, smallpox, etc., were in major decline **decades before** widespread vax use, due to many hygienic improvements. Medical historians record disease causes as rats, slums, foul water (animal/human waste), diseased milk, malnutrition, poverty, polluted air, child labour and despair. This was rectified with new labor and building laws, sanitation, isolation, electricity, cleaning and nutrition etc. Not vax.

**11. A child’s immune system benefits from natural mild diseases** to develop lifelong immunity. \*Vaccinations prevent this.

**12. Vax are designed to artificially give us the disease.** \*Statistics show disease epidemics occur almost exclusively in regions **after the population has been vaccinated**. Independent studies show the claim that herd immunity prevents epidemics if 95% of people are vaxed is a **lethal** error. England in 1871-72 had 98% of people aged two to 50 **vaccinated with smallpox – 45,000 died of smallpox**. Germany had 96% vaxed & **125,000 smallpox deaths**. In 1940 Germany made Diphtheria vax compulsory. By 1945 diphtheria cases soared from 40,000 to 250,000.
